Our Expertise

Rapid work Delivery

Recorded Medical Scribe

Physicians share voice recordings of their patient conversations, enabling the scribe to comprehend the entire interaction.

Based on this discussion, the scribe meticulously creates medical notes. Once the note-making process is complete, the scribe submits the notes to the physician for approval. Upon approval, the scribes directly upload the notes to the **Electronic Health Records (EHR)**.

Delivery in 12-18 hours

Real-time / Live Medical Scribe

Physicians provide access to live streaming or feeds from clinical rooms, allowing our scribes to connect in real time. The scribe observes the live conversation between the physician and patient via streaming and promptly prepares the necessary notes. After charting or creating the medical note, it is submitted to the physician for review. Upon approval, the scribe directly uploads the note to the **Electronic Health Records (EHR)**.

Instant Delivery

Document based Scribing

In Healthcare Settings, Physicians Create Handwritten Notes and Fill Out Forms Based on Patient Discussions. To transform these documents into medical notes, physicians provide clear scanned copies to our scribes. The scribes meticulously prepare the necessary notes. Once the note preparation is complete, the notes are submitted to the physician for approval. Upon approval, the scribes proceed to upload the medical charts directly into the **Electronic Health Records (EHR)**.

Delivery in 12-24 hours

Medical Transcription

Physicians share recorded audio files with us, and our skilled transcriptionists meticulously transcribe the dictation exactly as it was spoken. This process operates offline, allowing physicians to send recordings at their convenience. Our team ensures an impressive accuracy rate of 98% or higher by attentively listening to every audio.

Delivery in 24 to 48 hours.

Book in just 5 minutes

Client's Preferred Documentation

Our medical scribes and transcriptionist are experts in preparing medical notes. Whether responding to real-time notes from doctors, audio recordings, or scanned documents, they serve as remote assistants to Physicians or healthcare providers. By incorporating provider and facility preferences, our scribes/transcriptionist ensure uniform and high-quality charting, adhering to established quality measures.
